

Lectronify Aluminum Mid-Range Boom Arm

Key Features

- Adjustable from 26 to 60"
- 5 lb Payload at Full Extension
- Pivot Clamp with 5/8" Receiver
- 5/8" Reversible Spigot
- 1/4"-20 and 3/8"-16 Threaded Posts
- Counterweight Hook
- Counterweight Sandbag (Empty)

*The **Lectronify Aluminum Mid-Range Boom Arm** extends up to 60" and collapses down to a compact 26" for portability. Made of lightweight aluminum, it features a sturdy design and supports speedlights, LED fixtures, reflectors, and light shapers up to 5 lb when fully extended. It's light enough to quickly set up as well as conveniently transport.*

The Mid-Range Boom Arm features a heavy-duty pivot clamp with a 5/8" light stand receiver and a ratchet handle for easy and secure angle adjustment. It also includes a reversible 5/8" spigot with 1/4"-20 and 3/8"-16 threaded posts that provide multiple mounting options. To protect your gear, the Mid-Range Boom Arm is designed with a counterweight hook and comes with an empty saddlebag-style sandbag that supports up to 5 lb to balance and secure your fixtures or accessories.

Sturdy and Lightweight

Ideal for when you're shooting on the go, the Mid-Range Boom Arm features sturdy aluminum construction and weighs just 3 lb. It collapses down to 26" to fit comfortably in a light case or tripod bag for easy travel.

Adjustable and Sturdy

The Mid-Range Boom Arm extends from 26 to 60" and is outfitted with a sturdy pivot clamp with a ratchet handle for accurate and secure angle adjustment. At full extension, the boom arm supports lights or other fixtures up to 5 lb.

Pro-Style Attachment

The mounting socket on the Mid-Range Boom Arm is a 5/8" receiver that's compatible with most light stands and other mounts with 5/8" pins. Additionally, a reversible spigot is included that features 1/4"-20 and 3/8"-16 posts for compatibility with most fixtures.

Counterweight

To protect your gear, the Mid-Range Boom Arm is designed with a counterweight hook and comes with an empty saddle sandbag that supports up to 5 lb to function as a counterweight. Additional saddle sandbags, sold separately, can be placed over the base of the stand leg to prevent your stand from tipping over.
