- Weighs only 2.6 lb

*This **Impact LS-RL7 7.2' Reverse Legs Light Stand** is a lightweight support that's ideal for location work or in the studio for use with a small lights or to hold reflectors. This is one of the few stands to be able to sit completely flush to the floor where they can be taped down or sandbagged to stabilize its load. The LS-RL7's unique design allows the legs to fold up around the central risers somewhat like an inverted umbrella. The result is a 7.2' light stand that breaks down to only 19.5" - short enough to fit in even the smallest light kit bags. The stand is topped with a 5/8" mounting stud with 3/8" threads, a 3/8" 1/4"-20 adapter, and weighs just 2.6 lb.*
