

Impact Tabletop Light Stand with Flat Base

Key Features

- Light Stand for Desk or Tabletop
- Load Capacity: 10 lb
- Height Range: 10.75 to 23.5"
- Telescoping Three-Section Riser
- 5/8" Baby Pin with 1/4"-20 Male Thread
- 5.9" Square Steel Base
- Nonslip Rubber Pads

*The **LS-TT-FB Tabletop Light Stand with Flat Base** from **Impact** is a lighting and camera accessory designed for content creators, vloggers, and influencers who need a tabletop stand to place a light, microphone, or camera at eye level. Unlike a desktop tripod, this light stand has a 5/8" baby pin for lights and LEDs that weigh up to 10 lb. The 1/4"-20 threaded top provides the option of mounting accessories like a mini ball head, action camera, or smartphone adapter.*

The 3-section riser column provides more than a foot of height adjustment, so regardless of the height of the desk, chair, or subject, it is easy to find the perfect angle for mounting a light, camera, or microphone. The flat, heavy-duty base provides a solid support, and its standalone design allows it to be moved wherever it's needed.

Compatible Products

- Ring lights
- LED lights
- Cameras
- Microphones
- Webcams

- Action cameras
- Smartphone adapters

Desk and Tabletop Stand

The LS-TT-FB is a freestanding light stand that can be easily moved from room to room or placed in the middle of a large table where a clamp stand won't reach. Up to 10 lb of gear can be mounted and adjusted to the ideal level.

Three-Section Riser

The 3-section riser column provides more than a foot of height adjustment, so regardless of the height of the desk, chair, or subject, it is easy to find the perfect angle for mounting a light, camera, or microphone.

Mounting Options

The 5/8" baby pin stud allows a light fixture like an LED or ring light to be mounted. The stud also features a 1/4"-20 screw to add accessories like a microphone, extension arm, or mini ball head to a setup.

All-Metal Construction

The LS-TT-FB is stronger than most desktop tripods and stands. The beefy metal riser is made to hold up to 10 lb without wobbling or shaking. Even the locking knobs and brake collars are metal, so gear will be held fast and won't slip from where it is placed. The heavy steel metal base will keep the stand upright, even with a slightly unbalanced accessory.

Rubber Base Pads

The rubber base pads will prevent slipping, even on highly polished surfaces, and won't scratch desktops or tabletops.
