- Multi-Voltage Operation

*The **Pro Copy Stand with Dual LED Panel Kit** from **Impact** is sturdy and versatile overhead camera platform that allows products or documents to be accurately and repeatedly photographed from above. It provides an alignment grid, a top-down shooting platform, and dual-LED lighting. The baseboard is 18% gray with a matte finish for convenient metering and setting color balance and features a grid that makes it easy to align each shot and take the same image again and again. A shooting platform offers a top-down angle over your subject and mounts on an adjustable 42" sliding column. Dual-LED light panels means each object will be well lit, and their five-way adjustment arms allow lighting at any angle.*

The camera platform has a load capacity of 8.8 lb and is suitable for use with compact and mirrorless cameras, as well as DSLRs, video cameras, and more.
